

# Pathful Domains for IT to Whitelist

Last Modified on 10/10/2024 4:24 pm EDT

The IT department plays a crucial role in ensuring smooth access to Pathful by whitelisting specific sites. This ensures that students and educators can access necessary resources without being blocked by network filters or firewalls. By whitelisting these sites, the IT department helps maintain seamless connectivity, reduces technical interruptions, and supports the successful integration of Pathful into your organization. This proactive measure ensures that learning platforms operate efficiently, enabling a better educational experience.

## List of Whitelist Sites (\*Required)

- \*.pathful.com
